Indian company controls 1.82M acres of forest

-plans to export logs for furniture manufacturing

0
SHARES

f Share

t Tweet

An Indian company that took over a forest concession in a biodiversity-rich area has been granted an additional concession to harvest lumber, which it will ship to India to make furniture and this was only disclosed yesterday by the government after questions were asked.

The forest area held by Vaitarna Holdings Private Inc. (VHPI), a subsidiary of Coffee Day Limited of India under its local subsidiary Dark Forest Company (S) Pte Ltd (DFCPL) has been increased to 737,814 hectares of forest (around 1.822M acres) after it acquired the second concession. The government further disclosed that it had accepted \$600M from the Indian company for the expanded acreage and this money was used to meet the sums outstanding to Clico policyholders following the collapse of the local company. The government statement came after the media began asking questions about a Times of India report on the deal.

V. G. Siddhartha

Operational activities have already commenced in the new concession while the company awaits environmental authorisation to begin work on its first concession. It is unclear what plans and permits have already been approved for its second concession. The acreage held by the Indian company - owned by V. G. Siddhartha - is nearly double that of the Iwokrama sustainable forestry development concession and around half of Barama Company Limited's massive 3.2M acre concession in the North West.

Last year, VHPI took over the State Forest Exploratory Permit (SFEP) for 391,853 hectares of forest originally awarded to US-based Simon and Shock International Logging Inc (SSI) in 2007. The Guyana Forestry Commission (GFC) yesterday said that due to prolonged non-compliance with the terms of the agreement by SSI, the SFEP was suspended in 2009.

After completing the necessary due diligences, the Government of Guyana approved a request

for a 100% change in the shareholders of SSI to VHPI, the statement said. "This approval in 2010 was also contingent on payment of all outstanding SSI fees (US\$ 254,000), and a commitment to execute a forest inventory, prepare a business plan, and conduct an Environmental and Social Impact Assessment (ESIA) for submission to the GoG," the statement added. It said that work is currently being finalised in these three areas. Once these are successfully completed the company can pursue the Timber Sales Agreement (TSA) which would allow for project implementation

The GFC said that at the same time, the TSA awarded to Caribbean Resources Limited (CRL) was also terminated and re-possessed by the government in 2010, because of continuous non-compliance with the terms and conditions of the TSA. It said that the government accepted an offer of \$600 million by VHPI to re-allocate this re-possessed concession of 345,961 hectares.

The re-allocation was done last year but was not announced. "The sum of G\$600 million was applied to help meet liabilities owed to policyholders of Clico (Guyana), given that CRL is part of the same group of companies as Clico which went into receivership in 2010," the statement said, adding that CRL continues to have significant indebtedness to Clico (Guyana).

VHPI has applied for environmental authorisation to start a logging and sawmill operation at its first concession in Region Nine. This was disclosed in an environmental notice in January of this year. The Environmental Protection Agency (EPA) has said that an Environmental Impact Assessment (EIA) is required for the project before any decision to approve or reject the proposed project is taken since the project may have significant impacts on the environment.

The project site is in the biodiversity-rich area surrounding the Iwokrama rainforest preserve. The forest concession is situated in the Upper Corentyne-Essequibo District and southeast of the Iwokrama Protected Area. It is south of the Sherwood Forests Inc.'s concession and East, West, and South of the Conservation International (CI) concession.

According to the project summary, the company plans to establish a composite logging and sawmilling operation with associated downstream processing plants and kiln drying facility. Housing for employees with electricity and potable water supply and other auxiliary facilities will be provided in order to realize the goals of the main beneficiaries and the vision of the Company. The project will be solely financed and managed by DFCPL, with a proposed total investment of US\$18.7M during the first five years stated as 2010 to 2015.

The summary says that during the pre-harvest phase of the operation, employment by the company is expected to be in the vicinity of 45 personnel. However, this figure will be increased to 321 persons once harvesting and processing activities commences. The life of the project is 25 years.

Meantime, in a report on the project yesterday, the Times of India said the company plans to transport cut logs on chartered ships from the Guyana to the Coffee Day Group's furniture plant in India. It said that the wood varieties to be shipped will include Greenheart, Purpleheart, Wallaba and Bullet Wood. The royalty to be paid to the Guyanese government is not clear. The company is planning to ramp up its furniture business in India and the new Dark

Forest Furniture Company “will represent all segments of furniture including modern, classic, ethnic for home, retail, office, lounges and life-style and entertainment furniture.”

The report said that the government here is in the process of rectifying a non-functional woodcutting and log-sizing unit at the leased forest area and shipping of logs will start once that unit becomes functional.

Regarding its first concession, the company has said that processing operations are planned to be located at or near Annai. Initially, the company will use portable mills to process logs into lumber until a stationary sawmill is established. The sawn lumber will be transported from Annai to Linden. Then from Linden, lumber will be shipped out to India for further processing. The bulk of the production, initially, will be exported to India, other Asian countries and Caribbean markets, the summary says.

Forest use has come under increased scrutiny here with Guyana involved in the Low Carbon Development Strategy and a US\$250M deal with Norway to reduce emissions from deforestation and forest degradation. Incentives have been set for Guyana to keep 99.5% of its forest cover intact and payments will be reduced should the deforestation rate goes over last year’s level. On Wednesday, Agriculture Minister Robert Persaud announced that the agreement with the largest logging company operating here, Barama Company Limited will be reviewed and its 1.6 million hectares forestry concession is likely to be reduced.

Critics have argued that when exploration permits fall into non-compliance like Simon and Shock’s they should be submitted to a fresh process rather than allowing the defaulting company to enter a transaction which allows it to recoup its investment and perhaps make a profit. Critics have also argued that oftentimes logging companies promise downstream processing to obtain concessions but this hardly ever materialises or only at a low level; the main objective being the export of logs.

Another, legitimate and pressing reason for the passage of the Freedom of Information Act and other key reforms have this (FOIA) modern and essential mechanism of checks and balance in governance, to help ensure transparency and accountability of governance, and governance by the rule of law - something, the Jagdeo/PPP administration is seriously lacking.

A Benevolent Dictatorship is not sustainable., the collapse of the Soviet Union and its communist satellite dictator - are profound examples of this, and it is delusional for the present and future ruling elites to attempt governance Guyana by some form of Benevolent Dictatorship.

For the first time in my life, I am convinced that the PPP Government is totally corrupted and they are selling out Guyana one piece at a time for the benefit of those in charge. This is not only outrageous, it is disgraceful and unexpected from the party of Cheddie Jagan.

What does president in waiting, Donald Ramotar, has to say about this? The PPP has gone beyond the PNC with crap. PNC and AFC, what are you doing about this disaster that is being hoisted upon the people of Guyana by the PPP?

Monkey with no Tree · 5 years ago

Our country is doing what a country with out with out strong Groups that are in place to protect the environment

It always seem to boil down to politics because there is not enough independent bodies in place.

No one group has an special rights to anything that belongs to the country because we are living in a free and fa world.

But a balance has to be reached and a line drawn with the extraction and cropping of the trees that control the climate of the earth.

We have a ethical responsibility to follow as Guyanese. It was placed upon us when we landed in South America a time ago.

Our world is moving faster and there is a high need for energy and consumer products. The East is growing China India are at a high with there exports of products.

Like countries around the world that are small and developed we have to maintain a strong VERY STRONG Value system with our TREES. TREES should not be sold for \$\$\$\$\$\$\$\$\$\$.

We know better and we have to do better.

VijaySingh · 5 years ago

Anything done in secrecy will be bad news and likewise give bad results, I have a better and more intimate knowle of Indian businessmen having lived and dealt with them. India has become a rich country only because the businessmen get more wealthy, not the country, The infrastructure of India still need a far way to go when one considers over 400 million who are in poverty and the huge child labour.Billionaires in India were told by Buffet and Gates to think about reinvesting in man. Having said that I understand the way the current D.Litt thinks, He digs to fill another, he cannot do better . Its his way of telling the people he creates wealth, but only after the media questions him. He does not volunteer transparency. The timber companies will come, harvest and leave because t are not accountable because the investment climate in Guyana is shrouded in secrecy. Entrepreneurship lies with who have vision , not those who happen to be where they are, To see a world renowned forester preach about fo stewardship in Africa , elsewhere and not in his land of birth tells you how the country treats brilliance and scholar This goes for the PNC too who also frustrated Captain Stoll and others who were gifted with visions to transform backwater that is today being parceled off to the highest bidder. I am not against investment because trade and business only can transform the landscape.

CRL was a disaster and never had a proper management, its inability to use its infrastructure tells of the archaic mentality that shrouds the country's riches, its people and resources. I am reminded of a pickpocket who robs a p of a valuable piece of jewelry and pawns or sells it to buy a plate of food or a few smokes. He couldn't care about value but only looks to satisfy his hunger or addiction. That is the story of a country led by a bottomhouse/outth economist.

Al Fernandes · 5 years ago

Apparently he made the deal when he went to India the other day, after receiving his honorary doctorate. Very sad

better than this. And what bothers me about this venture is why send the lumber to India to make the furniture, rather than creating jobs right in Guyana.

11   · Share >

dezetante > Al Fernandes · 5 years ago

That is what the CORRUPT Jagdeo led administration calls EONOMIZING and DEVELOVEMENT. Guyanese are a RAW-DEAL. Pocket Poor People/Cents.....Prominent Presumptuous People/Corrupt & Confused.

  · Share >

Kyattman · 5 years ago

"China is seen as more interested in purchasing the raw materials, such as logs, but nearly all timber lands in Canada are owned by provincial governments and are not for sale.

The provinces sell cutting rights to lumber producers, but there are restrictions on log exports.

``China is buying timberland in New Zealand, West Africa and other countries where they can export logs," Taylor Purchasing of cutting rights for the purpose of exporting the logs might raise political hackles in Canada, according analysts.

Canada gained a foothold in the Chinese market after Russia placed high tariffs on log exports used by Chinese sawmills, but Russia's expected entry into the World Trade Organization could bring those tariffs down.'

This is a good idea to sell cutting rights to investors. They can be Indians, Chinese, Africans or Martians! once they pay. There are about 71 trillion dollars in this world and money coming to Guyana is money gained. Countries as in Guyana case can capitalise on its natural resources and bring in foreign currency.

With strong management of our natural resources we can make money and still preserve and retain what we have. Forest left uncared for will deteriorate in time. It needs husbandry, dead trees to be removed and tree replacement must be mandatory. Tree planting will even provide a bigger and healthier forest!

In God we Trust, all else pay!

[see more](#)

4   · Share >

WCstar > Kyattman · 5 years ago

I have a problem with your last two paragraphs. "This is a good idea to sell cutting rights to investors..... once they pay." This is simply penny wise and pounds foolish. Or as Dr. Jagan once said : "Do not throw away the baby with the bath water."

"A forest left uncared for will deteriorate in time". Really? Where does this happen? Forests have existed for millions of years before man came on the planet. Competitive regeneration is what actually goes on in the natural world.

1   · Share >

dezetante > Kyattman · 5 years ago

What BULL-S#!+? Producing and exporting one's own products in foreign currency as well with more gains. creates more job opportunity for the locals. Is Jagdeo insulting the intelligence of the Guyanese again? Give citizens the Hook and TEACH them to FISH for their own SUCCESS.

All decisions made on behalf of our Country must be above board,in the open,expressed,discussed in depth with a concerned parties,opposition included,concensus gotten n then forward movement in the interest of all the People races,this must be seen 24/7.

Deals are being made apparently covertly to the advantage of certain Gov't representatives.Why only India getti access to almost 2 million acres,what about other Countries,Africa,Caribbean,UK n some others.

Let's keep n do most of our business at home n here in the Caribbean.

Why can't Guyana get a loan n start our own Furniture Company,Create Major employment for all our People,all ra move Forward in prosperity.

We're always giving away the profits,getting large apparent kickbacks n leaving the Guyanese People Hungry,stupid,fooled,hoodwinked n underdeveloped.

Every deal must be above board,visible,transparent n accountable.

The People must be satisfied.

The politicians are representing All the People,not themselves.

Politics must change in Guyana.Politicians are using our Country to amass Great Wealth for themselves n leaving of the People in Poverty.Plastic City.

This is terrible! The elected oligarchs are busy ensuring that the country will export its mineral wealth - namely go Now we have logs being exported to India for making furniture there. This will maintain Guyana at the status of a dankey cart economy. This furniture should be made in Guyana then then exported to India. This is the recipe for underdevelopment. Then we have the CLICO mess intermingled with this investment. This pure cake shop econon thanks to the Jagdeo strategy (which Mr. Ramoutar will have to follow for his first five years). This line of investme will keep the country poor but the wealth of the oligarchs will continue its growth at an exponential path.

11 △ | ▾ · Share >

Kyatman, The problem is that the govt is just fine with receiving 600 million- this is only 120 acres of Prado land (5 million per acre).

Common sense economics tells you that the lower the supply (the forest) the higher the price for sale. Furt a govt with a development strategy would have pursued this investment for infinite yields in the following:

- 1) Knowledge and technology transfer from setting up the manufacturing entity in Guyana
 - 2) JOB creation for the many semi and unskilled labour; the suffering Crafstmen comes to mind.
 - 3) Taxes
 - 4) Subsidiary industry demand for inputs into the furniture plant
-and more.

Directly and indirectly this project could easily employed a conservative 100 people with an injection of ove million per month.....instead its 600 million for life.

I therefore concur with TK that the deal served the interest of the Businessman and benefactors.

It is in the very same breath and likeness of this secrecy in pledging/pawning Guyana's resources to foreign comp (which is not an issue or a problem, once our Guyanese nation is being benefited from such investment in our cou it is in the same likeness and manner of jim-jones era.

The Guyanese populace did not knew anything or nothing of the existence of jim jones, until disasters stroked.

The last trip to India by bharrat jagdeo, I did blogged on SN that India would not invest millions of US\$ in Guyana f free, it has to have a retumed favour in place.

I wondered now, if Norway's Minister of Environment knows about this "done-deal".

Some fellow bloggers on this forum, have stroked/wiped Mr. Ramjattan severly, for endorsing an informal letter tha was addressed directly to the Norwegian's government, related to the current destruction of our forests.

Mr. pressi, why all these secrets and your defiance and betrayal to our nation, be honest, opened and frank to ou people na maan, do it fu once na maan.
