STRATEGIC PLAN - GhIE

1. INTRODUCTION

The Ghana Institution of Engineers (GhIE) was founded in 1988. The GhIE was established under the Professional Bodies Registration Decree NRCD 143.

Its main objectives are:

- To advance the science and profession of engineering to the benefit of society.
- To establish and manage a register of all engineering disciplines qualified to practice in Ghana.

The Ghana Institution of Engineers needs to:

- ensure its relevance and acceptance through repositioning itself for the 21st Century.
- be recreated as a body of excellence.
- be capable of influencing future engineering and technological policy decisions for the development of Ghana.

Hence, the necessity to develop a strategic plan.

2. VISION

- Promoting Engineering Excellence for Society.

3. MISSION

We shall:

- Be leaders in the development of Science, Engineering and Technology at all levels of Society.
- Share knowledge and instill in the membership, professionalism and ethical practice.
- Establish structures to ensure good corporate image of the Institution at all times.

4. CORE VALUES

As an Institution our values and beliefs are as follows:

- Sharing and practicing of engineering and technical knowledge.
- Continuous improvement of engineering and technical knowledge.
- Using engineering solutions to improve the living standards of society.
- Adherence to the ethics of the profession.
- Our actions shall not be detrimental to the environment.
- Transparency.

5. SWOT ANALYSIS

5.1 Strengths

- Availability of large and diverse pool of engineering and technology expertise.
- Representation on certain national decision-making bodies on vital technological issues.

Abstract

Targeted intervention projects as part of public policy raise project management challenges. This paper offers a theoretical proposition and strategic view on public policy rural export-led projects. The paper draws on concepts of implementation and used a qualitative mode of enquiry to elicit information on rural export projects. Managing rural export-led projects is not merely implementation management but strategic and requires balanced consideration of the strategic business environment (feasibility of goals, domestic and export market, rural technology, socio-cultural beliefs and values, economic and political issues) and project factors (effective client consultation, project planning, implementation, monitoring and evaluation).

Key words: project implementation, rural export, public policy, strategy

INTRODUCTION

The implementation of public policy is a central concern for analysts. Challenges are raised when targeted intervention projects are delivered as part of public policy, especially in poverty alleviation programmes. In recent years, rural export-led projects have received great attention. The rural sector in most developing countries offers potential for increased exports, especially non-traditional export products, as well as for expanded employment opportunities. Until recently for example, three products dominated Ghana's exports – cocoa, timber and minerals. The sluggish demand for, and unstable prices of these products in the international market resulted in low and uncertain export revenues. Successive governments have taken measures to reduce economic over-dependence on these three products by diversifying the export base through rural export development. The Ghana Export Production Village projects, implemented by the Ghana Export Promotion Authority, aimed to establish rural export production structures to strengthen the export production base, enhance rural businesses, improve employment opportunities and living conditions. Sri Lanka was a trailblazer in rural export-led projects. Until the last decade, three plantation crops dominated Sri Lanka's exports – tea, rubber and coconut. The government took policy measures to reduce economic over-dependence on these by diversifying the export base.
