Study rice land lease - NFAEA

Manila, Philippines – An official of the National Food Authority Employees Association (NFAEA) has asked the government to study the proposal for the lease of 200,000 hectares of land to produce 1.2 million metric tons (MMT) of rice for the Saudi Arabian market.

NFAEA vice president Larry Tan asked the Department of Agriculture (DA) where it would source the land to be leased to Dr. Khalid Abu AlSaud of Dar Al-Maskukat Trading of Riyadh, Saudi Arabia.

Tan urged DA Assistant Secretary Dante S. Delima to study the April 1, 2012 proposal of Al Saud, which was coursed through Dr. Eduardo C. Sison of the Madecor Group of Los Banos, Laguna, noting that it could have an impact on the country's own rice supply situation. "What is the implication of the lease of the 200,000 hectares of private and public agricultural land that will be used exclusively to produce 1.2 MMT of rice for the Saudi market? Will it contribute to rice self-sufficiency by 2013?" Tan asked. (Marvyn N. Benaning)
