About Us

Tirupati Development (U) Ltd was established in 2006 to undertake civil construction and real estate development business. The company derives the name from its mother company - TIRUPATI SARJAN INDIA.

After making its foray into real estate in India, Tirupati Limited has emerged as one of the prominent Indian real estate companies riding on the demand for world-class housing and business complexes. In a short span of years, Tirupati Group has carved a niche for itself for providing affordable residential and commercial real estate solutions that offer value for money to its customers.

Tirupati Ltd has so far completed and delivered over 2000 projects in India consisting of residential estates, commercial shopping complexes, recreational parks and educational facilities valued in \$billions, all on time deliveries. Our projects spread across Europe, Asia and currently Africa; in particular Uganda where we have a number of projects under development.

Our Objective

The company's two main objectives have been:->
» To provide well designed properties and property services to the increasing number of interested home and commercial property owners in the local market.
» To promote (through example) an awareness that profitable development need not destroy the local environment, but can build upon and reinforce the qualities and traditions of local life.

Our Vision

We are making a radical and mutually beneficial move in the industry. The Tirupati Group is shifting focus from "Build to Rent" to "Build and Transfer Ownership". Our vision is to create a new and large group of home and property owners in Uganda and reduce the burden of renting on the people of Uganda.

Our Commitment

Our team comprises qualified local and international staff and associates who have built up a local knowledge and understanding of the local market and are well equipped to provide a comprehensive range of consultation and development services.

Our commitment is to help create a more open and efficient property market in Uganda for the long-term benefit of the community.
