Tirupati Farm-Kayunga

Tirupati Development (U) Ltd has purchased 3,000 acres of land in Kitwe, Kayunga that will be operated under Tirupati Agricultural Development Ltd (TADL).

Farming at Tirupati Farm will be carried out in two sections:-

A Demonstration Farm and cash crop production on 400 acres. Cash crops to include pineapples, Maize and Onions, Sugar Cane production on 2,500 acres with a small-scale factory for value addition.

Tirupati Agriculture will be devoted to helping farmers through certain objectives:-

Introduction of latest agriculture technologies.

Importation of high yielding and disease free varieties of cereals, cash crops and horticultural crops for greater production.

Demonstration of effect of application of manures and fertilizers, use of insecticides and pesticides and systems of irrigation.

As the area is undeveloped, this project is expected to encourage development within the area and attract other small scale factories such as maize mills, oil mills, etc.

This in turn we expect to uplift the socio economic level of the local farmers and community at large.
