UAE-based Al Dahra to build 10 biogas plants of 999 kW each in Serbia

BELGRADE (Serbia), November 13 (SeeNews) - UAE-based Al Dahra Agricultural Company plans to build an industrial complex of 10 independent biogas plants in Belgrade, the city government has said.

The plants will have a capacity of 999 kW each and will be constructed in the Palilula municipality of the city of Belgrade, the city government said on Sunday in an invitation to the public presentation of the project, to take place next week.

Source: Serbian Privatisation Agency

No financial details were revealed.

A biogas plant is a facility using a fermentation process to convert different biomasses such as farm waste, manure and industrial organic waste into methane gas and organic fertiliser.

In October, Serbia signed a contract for the sale of Serbian agricultural company Poljoprivredna Korporacija Beograd (PKB) to Al Dahra. The UAE-based company won a tender for the acquisition of PKB in September, after placing a 105.05 million euro (\$115.7 million) cash offer for the assets of the company.

(\$ = 0.907609 euro)
