FOCUS AREA

In keeping with its sustainable development programme, VL focuses on the following areas to touch the lives of local communities.

Health

In keeping with its objective of improving the health conditions of local communities, VL provides a wide spectrum of basic and specialized health services. These include mobile health units (MHU), basic health services with child care facilities, malaria control drives and cataract operations.

Education

VL is firmly committed to improving the quality of life of local communities through a number of progressive educational initiatives. These include elementary education for children, renovation of schools, computer literacy programmes, scholarships for meritorious students and centralized kitchen to reduce drop out rates and enhance nutritional standards. VL partners various civil society groups and NGOs to strengthen educational infrastructure in rural areas.

Livelihood

VL provides a wide gamut of services that seek to equip local community members with important employment-generating skills. These include entrepreneurship development for women, vocational training, creation of small scale enterprises and cultivation of crops.

Infrastructure

VL's goal of facilitating sustainable development among rural communities is closely linked to the enhancement of rural infrastructure. The company has taken up several projects to construct road and bridges, construct tube wells, facilitate watershed development and supply electricity to villages.

Environment

Environmental sustainability is a key aspect of VL's sustainable development initiatives. The company strives to educate local
