## Winslow Group - Company Information

Winslow Group has been established in 2003 through a Bulgarian-British partnership. The company has focused its efforts in the following main directions-property management, agriculture and alternative power engineering.

Winslow Group has started as a company working in the sphere of residential and commercial real estate-projection, construction, sales as well as property management. Winslow formed a joint venture company with RREEF in 2006 aiming the realization of some immense construction projects in Bulgaria. RREEF is the real estate and infrastructure investment management arm of Deutsche Asset Management-the global investment management business of Deutsche Bank.

Winslow Agro Fund is a subdivision of Winslow Group the main activity of which includes acquisition of agricultural land and growing of agricultural products. The company grows mainly cereals and oil-bearing crops-wheat, maize, sunflower, rape and barley. As of December 2008 Winslow Agro Fund owns over 1500 hectares of agricultural land in Bulgaria and farms over an additional 2000 hectares of rented land.

As of December 2008 WAF owns over 1 500 hectares of agricultural land in Bulgaria, and farms over an additional 2000 hectares of rented farmland. WAF's farm management business, which was started in 2004, is located in the Parvomai region, in Southern Bulgaria. To date, other than its investments in land, WA has invested over 2.5 million euros in top quality specialized agricultural machinery, a large farm base with warehouses and offices.

Winslow Energy is a subdivision of Winslow Group dedicated to the development of Renewable Energy Projects. Winslow Energy is having two directions of development: Wind Power and Photovoltaic projects. The department has been cooperating with leading international companies in the development of its energy projects.
